

When the pot is sitting on its collar the bottom of the pot does not touch the top of the bricks.

There is a small gap of 3 or 4mm.

See the top view for the position of these flow control bricks.

FRONT VIEW - Section through Centre

Place shims (3 or 4 mm thick) on top of the bricks. Drop in the pot to rest on the shims. Slide the collar down firmly against the ring of flat bar. Weld the collar to the pot or clamp as appropriate. Remove the shims.			2024 MEMD 250 LITRE STOVE Key Features: Primary air is supplied between the bricks under the fuel Bricks block direct exit of gases Brick combustion chamber
			Material: Brick and High temperature brick Quantity: Various Scale: Not to scale
